Elias Joel Olguin

Full Stack Developer · C# / .NET Core · React & TypeScript

eliasolguinde@gmail.com | Cologne, Germany | **EU Citizen**

PROFILE

Full Stack Developer with 2 years of professional experience building and maintaining production-critical applications in **C#, .NET Core, React, Redux, TypeScript and SQL Server**. Delivered systems end to end, covering database design, REST APIs, React frontends and **legacy system modernisation**, for a manufacturing operation spanning **6 facilities** and thousands of units produced daily. Promoted from the production floor into software engineering. EU citizen based in Cologne and available immediately.

TECHNICAL SKILLS

Frontend	React · Redux · TypeScript · JavaScript (ES6+) · Angular · HTML5 · CSS3
Backend	C# · .NET · .NET Core · REST API design
Databases	SQL Server · MySQL · Relational schema design
Tools & Practices	Git · SourceTree · Jira · Debugging · Testing · Code review · Agile teamwork

EXPERIENCE

Relocation & Italian (EU) Citizenship · Germany and Italy — Feb 2024 – Present

Relocated from Argentina to Germany in May 2024. Spent five months resident in Italy to complete the Italian citizenship process, then returned to Cologne, working interim positions and building personal development projects while settling. Now established and available to start immediately.

Newsan S.A. · Ushuaia, Argentina — Aug 2020 – Jan 2024

Software Developer — Apr 2022 – Jan 2024

- Developed and maintained full-stack applications across **frontend, backend, REST APIs and relational databases**, owning features from requirements through production support.
- Worked directly with engineering teams, production supervisors and line operators to gather requirements, troubleshoot live issues and iterate on solutions in a 24/7 manufacturing environment.
- Performed application **testing, debugging and production support**, iterating on solutions against real manufacturing requirements.
- Managed tasks in **Jira** and version control with **Git / SourceTree**, submitting all work for review and approval by the technical lead.

Production Traceability System

React · Redux · TypeScript · C# · .NET Core · SQL Server

- Owned the design and development of **SPP**, the core module for configuring and validating production processes, used daily by supervisors, engineering and production management across **6 manufacturing facilities**.
- Designed the database schema, table relationships and business logic covering models, serial numbers, workstations and validation rules.
- Built **configurable Regex-based validation rules** that verify component codes against production requirements, catching assembly errors before units move down the line.
- Helped replace a slow, rigid legacy desktop system with a flexible web application, improving validation, configuration and operational visibility across all production lines.
- Deployed the system **on-site in Buenos Aires**, implementing it from the ground up alongside local engineering teams.

ESD Safety Equipment Control System

React · C# / .NET · SQL Server · Raspberry Pi integration

- Built an **end-to-end application** monitoring electrostatic discharge (ESD) safety compliance at critical workstations, designing the business logic, database structure, personnel management and validation workflows from scratch.
- Integrated the application with a **Raspberry Pi test rig**, processing Good / No Good results from anti-static wrist strap and heel grounder tests.
- Implemented shift-aware logic that identifies personnel on each shift and dynamically displays who still requires ESD validation.
- Automated personnel updates at shift changes and generated **end-of-day compliance reports** for production supervisors.

- Worked closely with engineering to integrate the software with **hardware-based testing** and deploy the solution into a live production environment.

Mobile Device Repair Technician · Newsan S.A. May 2021 – Mar 2022

- Managed technical operations for a production line, identifying and reporting manufacturing and device-level faults.
- Partnered with engineering to troubleshoot production problems and implement fixes; supervised and mentored a junior technician while coordinating daily technical tasks to maintain production continuity.

Brazing Welder · Newsan S.A. Aug 2020 – Apr 2021

- Brazed and assembled components to daily production targets. **Promoted twice on merit**, from the production floor to technician, then to software developer.

EDUCATION & TRAINING

Frontend Development Diploma: Angular & JavaScript Aug – Dec 2022
Universidad Nacional de Tierra del Fuego, in partnership with Panalsoft

Full Stack Development Program 2022
UTN Buenos Aires with DirMOD and the Government of Tierra del Fuego · PHP, Laravel, JavaScript, Angular, MySQL

Back End Development Diploma: C# & .NET Aug – Dec 2021
Universidad Nacional de Tierra del Fuego, in partnership with Panalsoft

LANGUAGES

Spanish: Native | **English**: B2, professional working proficiency | **German**: A1, beginner
